For Teachers and Families

IVRIT HAOR • ALEPH TRACK

This book follows the established Aleph Track sequence. Each lesson has a letter page and a reading page. Picture clues support recognition; the printed Hebrew letters and vowel marks are the source to read.

A simple 30 minute lesson

5 minutes Review earlier letters and one familiar vowel.

8 minutes Meet the new letter shapes and make their sounds.

7 minutes Study the new vowel or practice the sound lab.

7 minutes Read, point, circle, and write.

3 minutes Ask the quick check aloud and end with success.

Reading rules that matter

- Hebrew runs from right to left. Point to one letter at a time.
- A dot inside כּ ,בּ, or פּ changes the consonant sound. A vowel dot beneath or above belongs to the vowel system.
- שׁ has its dot on the upper right and says sh; שׂ has its dot on the upper left and says s.
- At the end of a word, מ נ כ פ צ become ם ן ך ף ץ.
- Vowel names and sounds vary a little by reading tradition. This book uses common beginner Israeli pronunciations and flags the most important variation.

Instruction and assessment

Read a model aloud before asking students to decode independently. Let students name the picture, point to the letter, and say the sound. The quick checks are oral and low pressure. Aim for fluent reading with common vowels; sheva, the three hataf marks, and qamats qatan are recognition and teacher-modeling goals. The last pages provide letter and vowel charts and a teacher key.

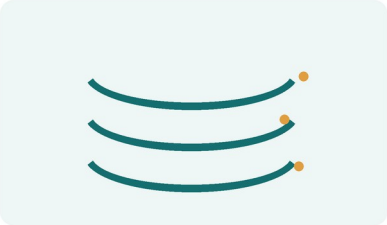

Niqqud is printed with each Hebrew example. Print at actual size so the small marks remain clear.

Teacher Key and Teaching Notes

USE WITH THE 12 LESSONS

- Lessons 1–2: א and ע carry the vowel in these beginner examples. בּ = b; ב = v. Patach and qamats gadol = ah; hiriq = ee.

- Lessons 3–4: מ = m, ט = t, ר = r, ד = d. Introduce Segol on the Lesson 3 sound page before independent practice; Lesson 4 reviews it. Contrast the top corner of Resh and Dalet.

- Lessons 5–6: ח = kh, ה = h, ו = v, שׁ = sh, ל = l, י = y. Holam = oh; וֹ can represent oh.

- Lessons 7–8: נ = n, ג = g, ס and שׂ = s, ת = t. Qubuts and shuruq = oo. Shin dot right; Sin dot left.

- Lessons 9–10: ז = z; כּ = k, כ and ך = kh; פּ = p, פ and ף = f; צ and ץ = ts. Tsere is commonly eh, and some traditions use ay. Sheva can be brief or silent.

- Lesson 11: ק = k, remembered by key; קַר (kar) means cold. The five final pairs are מ–ם, נ–ן, כ–ך, פ–ף, צ–ץ. Qamats qatan in כָּל sounds oh and is modeled by the teacher.

- Lesson 12: the three reduced marks are recognition goals: hataf patach (short ah), hataf segol (short eh), and hataf qamats (short oh).

Check answers

Part 1: b/v; k/kh; p/f; right/left. Final forms: ם ן ך ף ץ. Part 2 new syllables, reading from right: ka, zi, pu, le, ro. Recognition row: su, su, sh + sheva, short kha, kol. Picture words: peh (mouth), pitsa (pizza), etz (tree). Accept the local pronunciation of tsere.

The short syllable charts are practice approximations. Keep lexical words and names in a consistent spoken Hebrew tradition.
